

Jannick Wolters

Applied Mathematician

About me

I am currently living in the beautiful city of Aachen, working on my Ph.D. at Karlsruhe Institute of Technology.

During my studies i developed a passion for solving complex real world problems from the realm of transport equations on modern HPC architectures. Being a quick learner and reliable team player, i have successfully been working on a wide range of problems with fellow Ph.D. students as well as industry partners.

As I am now close to finishing my Ph.D., i am looking forward to work on new and exiting topics.
